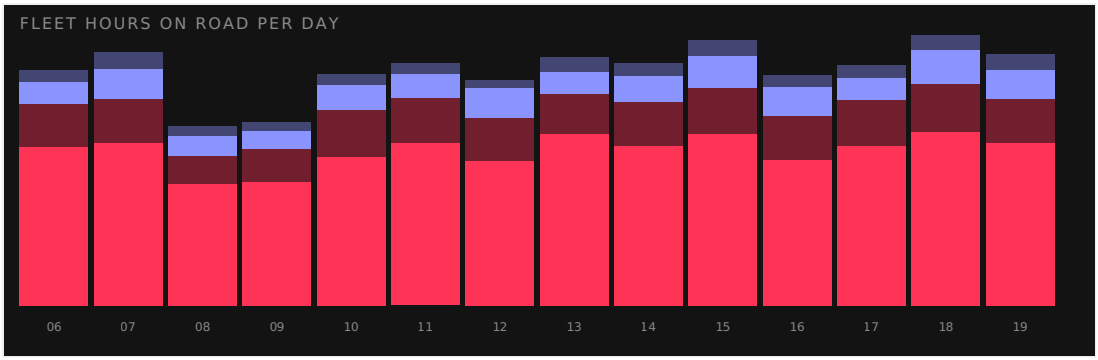
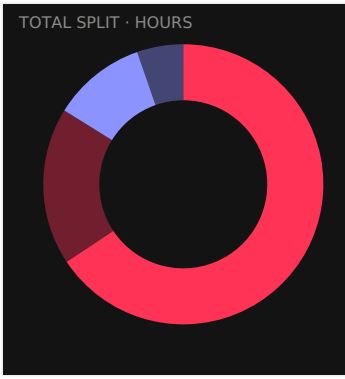
FLEET WATCH
Generated 24/07/2026 08:41
BODS + TfL + Open-Meteo

VEHICLES **12**	DAYS AUDITED **14** of 21	HOURS ON ROAD **1844.1**	EST IMPRESSIONS **3.1M**
MOVING **76%**	IDLE IN SERVICE **24%**	NIGHT SHARE **16%**	DISTANCE **16,339** km
EST CO2 **21,168** kg	DRY WEATHER **68%**	AVG TEMP **19.4°C**	CAPTURE CONFIDENCE **93%**

HOURS ON ROAD, DAY BY DAY





Method. Every vehicle was checked once per minute against the DfT Bus Open Data Service (BODS) live GPS feed, with a Transport for London prediction fallback inside London. Each minute is classified moving or idle and day or night. Distance is the summed GPS track. Impressions are an **estimate**: distance × 210 contacts/km for a full wrap, night hours weighted to 35%. CO2 is an **estimate** from distance and Euro class plus idle emissions. Emissions class is estimated from the plate year where DVLA lookup was unavailable. Weather from Open-Meteo at the fleet's live position. Capture confidence is the share of elapsed campaign days on which at least one vehicle reported; gaps indicate audit-server downtime, not necessarily idle buses.

PER-VEHICLE RECORD

VEHICLE	CLASS	ON ROAD (H)	MOVING (H)	IDLE (H)	KM	EST IMPRESSIONS	EST CO2 (KG)
